ACKNOWLEDGEMENT

I give all honor and praise to the Lord who gave wisdom and enable to complete my project successfully.

I express my sincere and heartfelt thanks to respected **Dr.Thomas K.V**, our beloved principal for providing necessary facilities for the completion of our project successfully.

I think profusely **Ms. Preethy George**, Course Coordinator of Computer Science Department for her guidance and inspiration throughout our course of study.

I express my sincere gratitude to my project guide, **Ms Elizabeth Poulouse** Assistant Professor in Computer Science Department for the valuable advices and guidance throughout the completion of my project.

I also express my gratitude and thanks to all my teachers and friends for their sincere and friendly cooperation in the successful completion of my project.

OBJECTIVE AND SCOPE

My aim of this project is to Identify Poor peoples who suffer from lack of food. People who do not have an income are issued this card. Unemployed people, women and old aged people fall under this category. These card holders are eligible to receive Foods from the selected hotels without money. The main aim of “Food for Life” is to avoid “Starvation”. Volunteers and representatives find out the eligible peoples and ensure this card. Anyone can be a part of this as a volunteer or a donor. The major features of the food for life is it ensures a world without starvation.

Food for Life is a mission to end hunger and no wasting of food to make a hungry-free world. According to the latest survey, 1.3 billion tons of food is thrown as waste every year. Additionally, one-third of the food consumed is stated as leftovers. The focus of this project is to reduce the amount of food wasted and being used to the needy people. Therefore, a web-based application is developed by which a person can donate money with their capacity and at the same time the donated money is used to provide free food for eligible people.
